*Election/Restrictions*

1. Restriction to one of the following inventions is required under 35 U.S.C. 121:

- I. Claims 1-26 and 46, drawn to a microelectronic apparatus, classified in class 257, subclass 678.
- II. Claims 27-45, drawn to a method of packaging, classified in class 438, subclass 106.

If group I is selected, further restriction is required to one of the following inventions under 35 U.S.C. 121:

- III. Claims 1-20, drawn to a system of molding a circuit package, classified in class 257, subclass 687.
- IV. Claims 21-26 and 46, drawn to a circuit package, classified in class 257, subclass 698. The inventions are distinct, each from the other because of the following reasons:

2. Inventions Group I and Group II are related as process of making and product made. The inventions are distinct if either or both of the following can be shown: (1) that the process as claimed can be used to make other and materially different product or (2) that the product as claimed can be made by another and materially different process (MPEP § 806.05(f)). In the instant case, instead of depositing a second support plate on the cavity plate, it would be possible to laminate both plates together before the assembly process.

Art Unit: 2814

3. Inventions Group III and Group IV are related as combination and subcombination.

Inventions in this relationship are distinct if it can be shown that (1) the combination as claimed does not require the particulars of the subcombination as claimed for patentability, and (2) that the subcombination has utility by itself or in other combinations (MPEP § 806.05(c)). In the instant case, the combination as claimed does not require the particulars of the subcombination as claimed because the circuit package can be used to encapsulate a printed circuit board. The subcombination has separate utility such as installing the chip into an integrated circuit of an optical device.

Because these inventions are distinct for the reasons given above and the search required for Group I is not required for Group II, restriction for examination purposes as indicated is proper.

A telephone call was made to Mr. Michael Fletcher on 8/01 to request an oral election to the above restriction requirement, but did not result in an election being made.

Applicant is advised that the reply to this requirement to be complete must include an election of the invention to be examined even though the requirement be traversed (37 CFR 1.143).
